

UNIFIED ENTERPRISE AI

OneAI

One AI platform for your entire company. Controlled, audited, and cost-efficient.

- Centralized dashboard
- One budget for everyone
- Latest models on release

01 — CONTROL

Centralized AI rollout

Manage and monitor all AI usage from one dashboard. Zero Data Retention (ZDR): your data is not stored for model training.

02 — BUDGET

One invoice for all

Pay once per month for every employee. No individual AI stipends that are hard to track or reconcile.

03 — CAPACITY

Latest models, fast

Access current AI models as they launch — OpenAI, Anthropic, DeepSeek, and more. Admins choose which models are available to each team.

WHAT YOUR TEAM CAN DO

Read & create office files

DOCX, PPTX, XLSX, and PDF — generated directly from AI commands.

Shared knowledge

Upload internal documents. Teams get answers from your company knowledge base.

Write & run code

AI writes and executes code for more complex tasks.

Speech to text

Turn voice into text — ideal for meeting notes and documentation.

Browse the web

Search for up-to-date information so answers stay accurate.

Text to speech

Convert text to natural speech for audio content and virtual assistants.

PLAN · UP TO 40 USERS

Rp12.400.000 / month

Billed quarterly · Rp37.200.000 per quarter

Save 10% with annual billing

Includes USD 300 AI credit, 1x team onboarding, and monthly usage reports. Customization (internal systems, custom SSO, etc.) scoped separately.

COMPARE

Individual AI stipends usually fail

- Usage cannot be verified
- Funds may not be spent on AI
- Extra admin overhead, higher cost
- No centralized control

WHY CREDITS OR STIPENDS AREN'T ENOUGH

ChatGPT seats cost less for small teams. OneAI saves money once you need control, multiple models, and one budget for 20–40 people.

A fair objection: “We can give employees money, or buy credits ourselves.” That makes sense for small teams with chat-only needs. As headcount grows, stipends often aren't used for AI, admin overhead increases, and features you need must be bought separately.

NOT FOR YOU IF**Fewer than 20 people with chat-only needs**

For that team size, ChatGPT Plus or Business is usually enough and cheaper. OneAI isn't meant to replace personal subscriptions at that scale.

GOOD FIT IF**20–40 people who need one platform, not 20–40 subscriptions**

One invoice of Rp12,400,000 for up to 40 users, including USD 300 credit. At this point, per-seat plus separate credits matches or exceeds OneAI — without ZDR, RAG, or model control.

COST AND CAPABILITY COMPARISON · PER MONTH

	Individual stipends	ChatGPT Business	OneAI
20 users	Rp10,000,000 · Rp500k/person	Rp8,000,000 · \$25/user	Rp12,400,000
40 users	Rp20,000,000	Rp16,000,000	Rp12,400,000 · fixed price
AI credit included	No	No · bought separately	USD 300/month
20 users + USD 300 credit	Rp14,800,000	Rp12,800,000	Rp12,400,000
Single invoice & usage reports	No	Yes · ChatGPT only	Yes · all models
Ensure funds used for AI	No	Yes · within ChatGPT	Yes
Admin chooses available models	No	Limited	Yes
Multi-model, not one vendor	Depends on individual	No · OpenAI only	Yes
Zero Data Retention (ZDR)	No	Not ZDR	Yes
Internal knowledge, office files, code	No	Limited	Yes

Assumptions: Rp16,000/USD exchange rate. Stipend example Rp500,000/person/month. ChatGPT Business \$25/user/month (monthly billing). USD 300 credit ≈ Rp4,800,000. Competitor prices may change; figures are for comparison, not their quotes.

Stipends often don't become AI spending

Money in employee accounts can be spent on anything. There is no model reporting, no audit trail, and no way to enforce company policy. You pay for capacity you cannot see.

Per-seat costs scale linearly

ChatGPT Business for 40 people ≈ Rp16 million, before extra credits. OneAI stays at Rp12.4 million for up to 40 users, with USD 300 credit included. The fuller the plan, the lower the cost per person.

Separate features cost more

RAG, office files, code execution, ZDR, and model control usually become separate projects or subscriptions. On OneAI they are one platform. That is why this plan can cost less even when the headline price looks higher than 10 ChatGPT seats.
